PROFESSIONAL SUMMARY

Information Science graduate with practical experience designing and building full-stack applications and microservices – from Spring Boot/Java backends to React/TypeScript frontends – with a strong grounding in REST API design, PostgreSQL/MySQL, Docker, and software testing. Passionate about clean architecture, automation, and solving real-world engineering problems..

TECHNICAL SKILLS

Backend : Spring Boot, Java, Python, Node.js, Express.js, Bcrypt, RBAC, Spring MVC, Spring Security, Hibernate, JPA, Flask, RESTful APIs.

Frontend : React, TypeScript, JavaScript, React Router, Vite, Bootstrap,HTML5, Tailwind CSS, REST API Integration.

Database : MySQL, PostgreSQL, Mongo DB.

Cloud : Docker, Docker Compose, Git, GitHub, OpenAPI/Swagger, npm, Maven, CI/CD.

Testing Skills : Jest, SuperTest, Unit Testing, API Testing, Integration Testing, Manual Testing.

Concepts/Practices : Authentication & Authorization, Soft Delete Patterns, Data-Layer Security, Optimistic UI Updates, Server-Side Pagination & Filtering, API Documentation, Performance Optimization (Lighthouse auditing), Technical Documentation (README/architecture decisions)

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Adversity Solutions *Feb 2025 - May 2025 Mysuru, India*

Performed exploratory data analysis (EDA) to identify trends, patterns, and actionable insights from structured and unstructured data.Built interactive dashboards and visualizations using Power BI / Tableau to communicate findings to non-technical stakeholders. Collected, cleaned, and preprocessed large datasets using Python (Pandas, NumPy) to ensure data accuracy and consistency.

PROJECTS

BANKING MICROSERVICE APPLICATION- Backend Application | [GitHub](#) *May 2026- Jul 2026 Spring Boot,Java, PostgreSQL,, Spring Security, Maven, REST APIs, Docker &Docker Compose*

Developed a Banking Management System using a microservices architecture with separate Customer, Account, Transaction, APIGateway, and Service Registry services. Implemented RESTful APIs, JWT-based authentication, and integrated PostgreSQL databases for each microservice. Containerized all microservices and databases using Docker and Docker Compose. Applied layered architecture, Spring Data JPA, and inter-service communication to build a scalable and maintainable backend system.

SIGN LANGUAGE RECOGNITION -machine learning | [GitHub](#) *Feb 2025 - June 2025 Python, OpenCV, TensorFlow.*

Developed a real time sign language recognition using python and OpenCV, Implemented contour analysis for gesture recognition via webcam achieved 95% accuracy on basic hand gesture.

TASK FLOW - | [GitHub](#) *July 2026 - July 2026 ,React, TypeScript,HTML5, CSS, Node, Express, PostgreSQL,, REST APIs.*

Built TaskFlow, a full-stack multi-user task management app with React/TypeScript (Kanban board, drag-and-drop, optimistic UI) and a Node.js/Express/PostgreSQL REST API featuring JWT auth, role-based access control, and soft-delete recovery. Implemented server-side filtering, sorting, and pagination; documented the full API with an OpenAPI spec; containerized the stack with Docker Compose for single-command setup, Achieved an 89 Lighthouse performance score.

CERTIFICATIONS & ACHIEVEMENTS

- Certificate awarded by NPTEL, for the joy of Computing using Python

EDUCATION

THE NATIONAL INSTITUTE OF ENGINEERING, MYSURU

B.E. in Information Science / 2021 - 2025
